

ZEEROCODES

DSS Master Production Prompt

Website + AI-powered LMS

DIGITAL SALES SCHOOL · PRODUCTION SPECIFICATION

1. BUILD DIRECTIVE

Build an original, premium Digital Sales School (DSS) website plus AI-powered LMS for Zeerocodes Automation Limited. Primary business objective: convert qualified visitors into active paid students, then help those students produce measurable evidence of digital-sales competence.

Use the uploaded DSS Handbook and Digital Economy Curriculum as the canonical product source. Preserve the programme's language: Digital Revenue Journey; DSS Sales Readiness Index; Sales Lab; eleven-piece portfolio; ten-part certification; Setter/SDR and Closer/AE tracks; six career tracks.

The curriculum is a 28-module, seven-part programme delivered over a 13-week core structure with a Sales Lab/deployment extension. Students are assigned a primary Setter or Closer track after the Week 6 checkpoint.

2. BRAND + DESIGN SYSTEM

Original aesthetic

- Premium Nigerian technology education brand.
- Deep ink foundation, restrained electric accent, optional cyan highlight.
- Large editorial headlines, generous whitespace, strong alignment and high-contrast CTAs.
- Use borders, subtle shadows and deliberate grouping rather than dense card grids.
- Use purposeful reveal, hover and progress animations; respect reduced-motion settings.
- Never copy reference-site logos, text, imagery, branding, proprietary assets or exact layouts.

Landing-page reference

Use the Global Sales University page as a design-language reference: strong outcome-led hero, problem agitation, proof, audience segmentation, curriculum/value explanation, offer, FAQ and repeated CTAs. Its current page also uses a free challenge/access mechanism as a conversion bridge. ■cite■turn0search0■turn0search1■

LMS reference

Use AAICBI's LMS design language as inspiration for education-platform navigation, course/module hierarchy, progress visibility and learner account structure, but create an original DSS interface.

3. WEBSITE INFORMATION ARCHITECTURE

Hero	Learn to sell technology. Build a career in revenue. Primary enrolment CTA.
Problem	Explain why generic sales training does not prepare people for technology sales.
Reframe	Digital sales = commercial side of technology.
Who it is for	Professionals, graduates, career switchers, salespeople, founders, freelancers/service providers, tech teams.
Digital Revenue Journey	Find → Start → Qualify → Discover → Present → Demonstrate → Handle → Close → Grow.
Curriculum	28 modules / seven parts / 13-week core.

AI-powered learning	AI buyer role-play, feedback, tutoring, adaptive practice.
Evidence	Portfolio, Sales Lab, Readiness Index and certification.
Internship/deployment	Show available opportunities without guaranteeing employment.
Offer	Programme inclusions, payment, cohort information, CTA.
FAQ	Remove objections.
Final CTA	Apply / Enrol Now.

4. AI LMS

Every module is locked by default. Module N+1 remains locked until the server confirms that Module N's required completion criteria have passed.

Default completion gate

- 100% required lesson completion.
- Quiz pass at configured threshold; default 80%.
- Required practical/assignment submitted and passed.
- Required role-play/assessment completed where configured.
- Required live session/attendance condition where configured.
- Required evidence uploaded.
- Completion timestamp, score, attempts and feedback persisted.

AI layer

- AI Tutor grounded in approved DSS content.
- AI Buyer Role-play: CEO, CTO, CFO, HR director, procurement manager, sceptical founder, price-sensitive buyer.
- AI Assessor scores questioning, listening, product knowledge, discovery, value articulation, objection handling, closing and professionalism.
- AI Practice Coach identifies weak competencies and creates drills.
- AI Study Planner recommends next actions.
- Human review remains authoritative for configured high-stakes certification.

The curriculum explicitly specifies AI-driven buyer personas and scoring against the same rubric as human role-play.

5. LMS SCREENS

- Student Home: progress, continue learning, next task, announcements.
- Curriculum: seven parts, 28 modules, locked/unlocked/completed states.
- Module Player: lesson, video, transcript, practical, quiz, assessment.
- AI Role-play: scenario, buyer, conversation, score, replay.

- Assignments: brief, submission, rubric, feedback, resubmission.
- Portfolio: eleven artifacts and review status.
- Readiness: ten competency scores and evidence.
- Certification: requirements, attempts, assessment result.
- Career: track, CV, LinkedIn, deployment resources.
- Internships: opportunities, eligibility, applications.
- Profile and notifications.

6. ADMIN + INSTRUCTOR

- Create/edit curriculum.
- Configure prerequisites and pass rules.
- Create quiz banks and assessments.
- Review submissions.
- Override completion only with mandatory reason and audit trail.
- Manage AI role-play scenarios/rubrics.
- Monitor cohort progress and at-risk students.
- Run certification.
- Publish internships/deployment opportunities.
- Manage admissions, payments and enrolments.

7. TECHNICAL DIRECTIVE

- TypeScript architecture with clear domain/application boundaries.
- Responsive desktop/tablet/mobile.
- Accessible keyboard navigation and reduced-motion support.
- SEO-ready marketing site.
- Server-authoritative authentication, payments and entitlements.
- Roles: visitor, applicant, student, instructor, assessor, employer, admin.
- Persist all progress and assessment state server-side.
- Protect premium media and student submissions.
- Audit completion overrides, assessment changes and certificate issuance.
- Abstract AI provider behind a service interface.
- Build loading, empty, locked, error and success states for all critical flows.

8. CORE DATA MODEL

User; StudentProfile; Application; Payment; Enrollment; Cohort; Part; Module; ModulePrerequisite; Lesson; LessonProgress; ModuleProgress; Quiz; Question; QuizAttempt; Assignment; Submission; Assessment; AssessmentAttempt; AssessmentScore; RoleplayScenario; RoleplaySession; RoleplayTurn; AIGrade; CompetencyScore; PortfolioArtifact; CertificationAttempt; Certificate; InternshipOpportunity; InternshipApplication;

Notification; AuditEvent.

9. ACCEPTANCE TESTS

- New student: Module 1 unlocked, Module 2 locked.
- Fail quiz: next module stays locked.
- Pass quiz but missing required assignment: next module stays locked.
- Complete every rule: next module unlocks.
- Refresh/login on another device: state remains server-authoritative.
- Admin override unlocks next module and creates audit event.
- Direct locked-module URL/API attempt is rejected.
- AI role-play produces a rubric-based session and feedback.
- Certification cannot issue without required evidence.
- Payment status controls entitlement.

10. FINAL BUILD COMMAND

Build the complete DSS website and AI LMS. Priorities: conversion, learning integrity, evidence-based assessment, AI-assisted practice, premium UX, mobile usability, accessibility, security, analytics and maintainability. Do not use lorem ipsum or fake proof. Where a business detail is not supplied, make it configurable rather than inventing a fact.
